SUBJECT INDEX

Exclusive of New Books

Absolute alcohol, prepared from strong spirit, - - - 504
— potential of hydrogen at a mercury cathode, - - 508
— temperature and viscosity of liquids, - - - 602
— zero, specific heats at, - - - - - 429
Absorption of a gas as dependent upon pressure, - - - 286
— of gas in a Crookes tube, - - - - - 81
— of gases, volume and density changes in liquids by, - - 278
— high temperature and the structure of silicic acid hydrogel, 499
— of light in colored glasses, - - - - 80
— of light in solid bodies as affected by temperature, - 79
— of radium activity by liquids, - - - - 518
— spectrum of colloidal ferric hydrate, - - - - 446
— thermal, of carbon dioxide, - - - - - 67
Accidental double refraction in liquids, - - - - 284
Accumulators of other metals than lead, - - - - 203
— lead, theory of, - - - - - - 203
Acetone, molecular weight of certain salts in, - - - 434
— electrolytic preparation of halide compounds of, - - 362
Acetylene, electrochemical behavior of, - - - - 205
— the acid nature of, - - - - - 514
Acetonitrile and pyridine solutions of silver nitrate, relative velocities of the ions in. Herman Schlundt, - - - 159
Acid nature of acetylene, - - - - - - 514
— triple salt, - - - - - - - 151
Acidimetry of arsenic acid, - - - - - - 363
Acidity, distribution of, in the stalk and leaf of the flower, - - 359
Action of hydrogen peroxide on silver oxide, - - - 356
Active oxygen, formation with ferrous oxide, - - - 154
Air barometer, - - - - - - 65
— relation between density and index of refraction of, - - 515
— thermometer, studies with the, - - - - 66
Alcohol and water mixtures, conservation of refractive energy in, - 363
— ethyl, and water, boiling-point curve for mixtures of, - 67
— with chlorides of manganese and cobalt, compounds of, - 351
Alcoholate of chloral and chloral hydrate, dissociation in solutions, 199
Alcohols, lower, mixture with benzene and water, - - 500, 501
Alkali chlorides, platinum-iridium anodes for electrolysis of, - 282
— chloride solutions, electrolysis of, with carbon anodes, - 281
— ferrates, electrolytic formation of, - - - 205
— hypochlorites and chlorates, electrolytic production of, - 204
— metals, photographs of the ultra-red spectrum of the, - 78
— metals, decomposition of the chlorides of, - - - 67
— salts of hydrogen peroxide in aqueous solutions, - - 158
Alkaline earth chlorides and phosphoric acid, - - - 356
— solutions of metallic hydroxides, - - - 504
Alkyl ammonium amalgams, - - - - - 205
Allotropic modifications of inorganic compounds, - - 199
Alloy with a cathode material and cathode disintegration, - - 512
Alloys, aluminum-iron and aluminum-manganese, - - 350
— binary, constitution of, - - - - - 432
— copper-tin, copper-zinc, and tin-zinc, new determinations of, 150
— formation and cathodic polarization, - - - 156
— metallic, specific volume as a characteristic of chemical compounds in, - - - - - - 150

Alloys of aluminum, - - - - - - - 498
— of aluminum and manganese, - - - - - 199
— of aluminum and molybdenum, - - - - - 350
— of antimony and tellurium, - - - - - 433
— of cadmium with barium and calcium, - - - - 498
— of cast iron and aluminum, magnetic properties of the, - 70
— of copper and cobalt, electrical properties of, - - 280
— of copper-tin, - - - - - - 498
— of copper and zinc, thermochemistry of, - - - 150
— of lead and tellurium, - - - - - 433
— of lithium antimonide, - - - - - 354
— of sodium and potassium, melting-point of, - - 433
— of strontium with zinc and cadmium, - - - 353
— of thallium, - - - - - - 432
— of tin, lead and bismuth. E. S. Shepherd, - - - 519
— of tin-aluminum, - - - - - - 350
Alternating current, determination of frequency, - - - 81
Aluminothermic welding by means of an automatic outflow, - 276
Aluminum, alloys of, - - - - - - - 498
— and molybdenum, alloys of, - - - - - 350
— and magnesium, alloys of, - - - - - 199
— and iron, nearly pure, magnetic properties of, - - 70
— chlorides and alkali chlorides, compounds of, - - 346
— ferric and magnesium chlorides, solubility of barium sulphate in, 436
— -iron and aluminum-manganese alloys, - - - 350
— preparation of, - - - - - - - 203
— tin alloys, - - - - - - - 350
Amalgam and electrolytes, capillary electrometer for measuring potential between, - - - - - - 361
— of ammonium, study of, - - - - - - 355
— of strontium, action of hydrogen on, - - - 356
— alkyl ammonium, - - - - - - 205
Amine salts, action of bases and acids on the, - - - 200
Amines, electrolytic reduction of aromatic nitro compounds to, - 206
— fatty, action of gaseous ammonia on the hydrochlorides of the, 351
— optical rotatory power of cane-sugar when dissolved in. Guy Maurice Wilcox, - - - - - - 339
Ammonia and ammonia bases, solubility of zinc hydroxide in, - 437
— and chlorine, reaction between, - - - - - 68
— compounds, metal, number of ions in, - - - 207
— gaseous, action on the hydrochlorides of the fatty amines, - 351
— in aqueous solutions, influence of sodium sulphate on the vapor pressure of, - - - - - - 436
— liquid, electrolysis of ammonium chloride dissolved in, - 362
— solid and liquid, heats of solution of, - - - 353
— solubility of, in salt solutions, by measurement of partial pressures, 278
— solutions, aqueous, physical-chemical studies on, - - 200
— thermal equivalents, dissociation, vaporization, etc., of, - 348
Ammonias of the metals, action on hydrogen sulphide, - - 355
Ammonium amalgam, study of, - - - - - 355
— bromide and the atomic weight of nitrogen, - - - 429
— chloride, decomposition of calcium and lithium ammonium by, 355
— chloride dissolved in liquid ammonia, electrolysis of, - 362
— nitrite, rate of decomposition of, - - - - - 154
— question in aqueous solution, - - - - 284
Analogous salts, solubility of, - - - - - - 499
Analytical chemistry and the phase rule classification. Wilder D. Bancroft, 106
Aniline and the analogous alkalies, method of preparing, - - 356
Animal membranes, permeability of, - - - - 506

Anode materials, artificial graphite and platinum-iridium as, - 208
Anodes of carbon, electrolysis of alkali chloride solutions with, - 281
— of lead, behavior of phosphoric acid, - - - 511
— platinum iridium for electrolysis of alkali chlorides, - - 282
— of platinum and platinum-iridium in electrolysis of hydrochloric acid, - - - - - - 512
Anomaly in oxygen at low pressure, - - - - - 276
Antimonide of lithium and some alloys of this metal, - - 354
Antimony, action of lithium ammonium on, - - - 354
— and tellurium, alloys of, - - - - 433
— atomic weight of, - - - - - 65
— metallic, action of organic acids on, - - - 504
Antiseptic action of the hydrogen ion in dilute acids, - - 514
Apparatus for determining the relative velocities of ions, - - 443
— for electro-analytical purposes, - - - 513
— illustrating ion velocities and transferences, - - 207
Aqueous solution, a small contribution to the ammonium question in, - 284
— solutions, metal-ammonia compounds in, - - 505
— solutions of certain electrolytes, solubility of calcium carbonate in. Cameron and Seidell, - - - - 50
— vapor, spectrum of, and the spectra of hydrogen, - - 446
Arc spectrum of iron, normals from the, - - - - 78
Argon and its companions, - - - - - 148
— liquid, temperature variation of the surface tensions and densities of, - - - - - - 601
— neon, krypton and xenon, classification of the atomic weights of, 346
— viscosity of, and its change with temperature, - - 84
Aromatic nitro compounds, reduced to amines, electrolytically, - 206
Arsenic, atomic weight of, - - - - - 496
— acid, acidimetry of, - - - - - 363
Arsenious acid and iodine, in acid solution, rate of reaction between. J. R. Roebuck, - - - - - - 365
Artificial graphite and platinum-iridium as anode materials, - 208
Atomic and molecular volumes, - - - - - 66
— mass and specific heat of vanadium, - - - 353
— mass, relation of properties to, - - - - 515
— volume, significance of changing, - - - - 496
— weight of antimony, - - - - - 65
— of arsenic, - - - - - 496
— weight of calcium, a new determination of the - - 429
— weight of calcium of, - - - - 496
— weight of nitrogen, ammonium bromide and the, - - 429
— weight of uranium, a new investigation concerning the, 146, 429
— weights, ninth annual report of the committee on, - 496
— weights, calculation of, - - - - 429, 430
— weights of neon, argon, krypton, and xenon, classification of, - 346
— weights, their tendency to approximate to whole numbers, 65
— weights, the unit of the, - - - - - 198
— volume, significance of changing, - - 146, 147, 276
Attraction, molecular. J. E. Mills, - - - - 209
Automatic temperature regulator, - - - - 430
Auvergne, formation of ice in the volcanoes of, - - - 346
Bacteria, action of Becquerel rays on, - - - - 285
Band spectrum of clay and nitrogen, - - - - 78
Barium and calcium alloys with cadmium, - - - - 498
— preparation of, - - - - - - 353
— sulphate, solubility in ferric, aluminum and magnesium chloride solutions, - - - - - 436

Barometer, air, - - - - - - - - 65
— with automatic zero, - - - - - - - 148
Becquerel and Röntgen rays, - - - - - - - 76
— and Röntgen rays, action of, on the eye, - - - 76
— rays, action of, on bacteria, - - - - - 285
Behavior of molecular compounds when dissolving, - - 504
Benzene and water, mixtures of the lower alcohols with, - 500, 501
Beryllium, a new volatile salt of, - - - - - 349
Binary alloys, constitution of, - - - - - - 432
— electrolytes, thermodynamics and dissociation theory of, - 513
— system, critical states of a. Paul Saurel, - - - 629
Bismuth, crystalline, thermomagnetic and thermoelectric properties of, 157
— electrical resistance in a strong magnetic field, - - 157
— lead and tin alloys. E. S. Shepherd, - - - 519
— nitrate, action of mannite on, - - - 200
— oxide, nitric acid and water the system, - - - 502
— quantitative determination by electrolysis, - - 158
— salts of, and the rare earths, isomorphism between, - - 153
Black bodies, radiation law of, - - - - - 81
" Black " body, an electrically heated, - - - - 80
Boiling-point curve for mixtures of ethyl alcohol and water, - 67
— — of liquid hydrogen, - - - - 431
— — molecular weight at the, - - - - 348
— — of liquids, correction of, to normal pressure, - - 496
— — of selenium and other pyrometric constants, - 347
Boiling-points and vapor pressure of mixed liquids, - - - 500
Borneol, change of the optical rotation in esters of the stable laevorotary, 363
Bromine and ethyl alcohol, reaction velocity of, - - 154
Bromoform by electrolysis, - - - - - 443
Cadmium, alloys with barium and calcium, - - - 498
— cell, Weston, researches with the, - - - 69
— quantitative determination of, - - - - 206
— zinc and strontium alloys of, - - - - - 353
Calcium and barium alloys with cadmium, - - - 498
— ammonium, decomposition by ammonium chloride, - - 355
— atomic weight of, - - - - - 429, 496
— carbide, formation of, - - - - - 438
— carbide, reactions during the formation of, - - 511
— carbonate, solubility of, in aqueous solutions of certain electrolytes. Cameron and Seidell, - - - - 50
— chloride solutions, refractive indices of, - - 77
— oxalate, solubility of, - - - - - 278
— occlusion of magnesium oxalate by, - - - 278
— salts of the acids of the acetic series, solubility of, - - 499
— silicide, investigations in, - - - - 353
Calculating solubilities and equilibrium constants of chemical reactions, 431
Calculation of atomic weights, - - - - 429, 430
— of the heat of sublimation of some elements, - - 349
— of the heats of dilution from Kirchoff's formula, - - 151
Calorimeter applied to measurements with rapid oscillating currents, 71
— experiments, a system of corrections for the heat losses in, - 430
Cane-sugar influencing the conductivities of solutions, - - 445
— optical rotatory power when dissolved in amines. Guy Maurice Wilcox. - - - - - - 339
Capillarity, influence of, on the velocity of efflux of fluids, - 83
Capillary constants of condensed gases, - - - - 82
— — of organic liquids, - - - - - 286
— electrometer, - - - - - - - 361

Capillary electrometer for measuring potential between amalgam and electrolytes, - - - - - 361
— phenomena, deductions from, - - - - - 83
— tubes, with liquids under the influence of an electric current, 75
Carbide of calcium, formation of, - - - - - 438
Carbon and hydrogen, direct union of, - - - - - 502
— and nickel steels, thermoelectricity of, - - - 360
— and iron systems, chemical equilibrium in, - - - 350
— anodes, electrolysis of alkali chloride solutions with, - 281
— compounds, molecular weights of some, - - - 501
— dioxide, absorption of, as dependent upon pressure, - 286
— — decomposed by electric discharge at low pressure, - 509
— direct combination with chlorine, - - - 283
— fusion of, - - - - - - 512
— monoxide, solubility in binary organic mixtures, - 504
— — liquid, temperature variation of the surface tensions and densities of, - - - - 601
— oxides, hydrogenization in presence of metals, - - 357
Carbonic acid and hydrogen, conductivity in, - - - 72
— and sulphuric esters, saponification of, - - - 439
— dioxide, thermal absorption of, - - - 67
Cast iron and aluminum, magnetic properties of the alloys of, - 70
— state of silicon in, - - - - - 351
Catalysis, - - - - - - - 279
— of hydrazine, - - - - - - 440
— platinum, paralysis by poisons, - - - 155
Cathode disintegration, - - - - - - 512
— rays, - - - - - - - 285
— — deflection of a magnetic needle by, - - - 77
Cathodes, lead and mercury, reducing action in sulphuric acid solutions, 510
Cathodic behavior of iron in ammonium nitrate solution, - - 281
— polarization and formation of alloys, - - - 156
Caubet, remarks on paper on the liquefaction of gas mixtures, - 435
$CdSO_4 \cdot \frac{8}{3}H_2O$, theoretical heat of solution of, - - - 499
Cell walls, generalization on the fixation of metals by, - - 358
— Weston cadmium a 14.3 percent amalgam, irregularities of, 69
Cells in which salt reaction is re-enforced by oxidizing and reducing agents, 441
— researches with standard, - - - - 69
— oxidation and reduction, - - - - - 359
Cerium carbonates and glucose, - - - - - 507
— oxide, crystallization of, - - - - - 351
— — preparation of, - - - - - 357
— peroxide, - - - - - - 507
Change in conductivity of salt solutions in liquid sulphurous acid, etc., 71
Changing atomic volume, the significance of, - - 146, 147, 276, 496
Chemical action in dissolved or gaseous systems, - - - 201
— — electrolytic conductivity and solubility in liquid hydrocyanic acid. Kahlenberg and Schlundt, - 447
— change, conditions determinative of, - - - 515

Instantaneous chemical reactions and the theory of electrolytic dissociation. L. Kahlenberg, - - - - - 1
Internal resistance and polarization of electrolytic cells, - - 441
— — of galvanic cells, - - - - 509
— — of the Weston cell, - - - - 71
Interpretation of certain modifications of metallic hydroxides, - - 437
Inversion of saccharose, - - - - - 358
— of zinc sulphate. Barnes and Cooke, - - - 172
— points for the heat of dilution, - - - - 352
Invertine, law of the action of, - - - - - 153
Iodine and arsenious acid in acid solution, rate of reaction between. J. R. Roebuck, - - - - - 365
Ionic velocities in aqueous solutions — new method for measurement of, 444
Ion velocities and transferences, apparatus illustrating, - - 207
Ions, color of, - - - - - - - 363
— in metal ammonia compounds, number of, - - - 207
— in solutions of silver nitrate in pyridine and acetonitrile, relative velocities of. H. Schlundt, - - - - 159
— negatively charged, conductivity produced by the motion of, 92
— positive and negative, - - - - - 72
— relative velocities of, apparatus for determining, - - 443
— specific velocity in the discharge from points, - - 73
— theory of, and contact electromotive force, - - 203
— transference number of, during electrolysis of their solutions, - 443
Ionizing media and inorganic solvents, - - - 445
Iridium-platinum and artificial graphite as anode materials, - - 208
Iron-aluminum and manganese aluminum alloys, - - 350
— and aluminum nearly pure, magnetic properties of, - - 70
— and carbon systems, chemical equilibrium in, - - 350
— and nickel precipitated from mixed sulphate solutions, - 206
— chloride, temperature coefficients of the susceptibility of solutions of, - - - - - - - 280

Iron group, temperature coefficients of the susceptibility of salt solutions of the, - - - - - - 280
— in ammonium nitrate solution, cathodic behavior of, - 281
— nitride, heat of formation and constitution of, - - 430
— normals from the arc spectrum of, - - - - 78
— passive, - - - - - - - 156
— pure, and steel, electrical resistance of, - - 513
Isobaric aqueous solutions, - - - - - 151
Isomeric transformation of indigotine into indirubine, - - 358
Isomorphism between the salts of bismuth and of the rare earths, - 153
Isopentane and normal pentane, thermal properties of, - - 149
Isopropyl isobutyrate, vapor pressures and specific volumes of, - 497
Isothermals of fluids and in particular of hydrogen, - - 149
Isotherms for mixtures of hydrochloric acid and ethane, - - 151
Isotropic media, elasticity constants of, and the molecular theory, - 82
Jena glass, expansibility of a hard, - - - - 66
Ketones, electrochemical reduction of, - - - - 204
Kirchhoff's formula, calculation of heats of dilution from, - - 151
Koenigsberger, J., on the susceptibility of water, remarks to the paper of, 281
Krypton, neon, argon, and xenon, classification of the atomic weights of, 346
Kinetic theory of gases and the expansion of a gas into a vacuum. Peter Fireman, - - - - - 463
— — magnitude of the osmotic theory in dilute solutions deduced according to the. Peter Fireman, - - - 636
Kinetics of photochemical reactions, - - - - 507
Laboratory barometer with automatic zero, - - - - 148
Law of action of sucrase, - - - - - 358
— of chemical mechanics, experimental verification of the, - 200
— of radiation of black bodies, - - - - 81
— of physical-chemical processes, - - - - - 148
— of the action of invertine, - - - - 153
Laws of Gay-Lussac and the dissociation of gaseous compounds, - 201
— of viscosity, - - - - - - 601
Lead accumulators, theory of, - - - - - 203
— accumulators of other metals than lead, - - 203
— and mercury cathodes, reducing action in sulphuric acid solutions, 510
— and zinc, hydroxides of, - - - - 437
— and tellurium, alloys of, - - - - 433
— anodes in phosphoric acid, - - - - 511
— chloride and sodium hydroxide, fused, decomposition voltage of, 442
— — fused, and of lead iodide, electrolysis of, - - 157
— electrolytically deposited from phosphoric acid solutions, - 511
— iodide, fused, and lead chloride, electrolysis of, - - 157
— silicates in relation to pottery manufacture, - - 505
— sulphohalides of, - - - - - - 68
— tin and bismuth alloys. E. S. Shepherd, - - 519
Leuko bases of fluoresceine, sensitiveness to the light of, - - 79
Light absorption in liquid bodies as affected by temperature, - 79

Polymerized state of ordinary indigotine, - - - - - 358
Polymolecular chemical changes, - - - - - 154
Porcelain and glass, expansion at high temperatures, - - 277
Positive and negative ions, - - - - - - 72
— glow, conductivity of a gas in the, - - - - 73
Potassium and sodium melting-point of alloys of, - - - 433
— chlorate, on the electrolytic reduction of. G. H. Burrows, - 417
— hydride, action on ethyl iodide and methyl chloride, - 356
— — preparation and properties of, - - - 352
— hydroxide, thermal study of solid hydrates of, - - 352
— metavanadate, action of hydrogen peroxide on, - - 279
— salts, sensitiveness of higher vegetables to, - - 207
Potential differences between amalgam and electrolytes, measurement of, 361
— of hydrogen at the mercury cathode, - - - - 508
— of ozone, - - - - - - - - 508
Potentials, electrode, - - - - - - - - 280
Pottery manufacture, lead silicates in relation to, - - - 505
Practical attainment of the thermodynamic scale of temperature, - 148
Praseodymium, - - - - - - - - 146
— and neodymium, sulphates of, - - - - - 358
— chloride, - - - - - - - - 355
Precipitates formed during electrolysis with soluble anodes, - - 511
— indirect weighing of quantitative, - - - - 68
Precipitation of colloids by electrolytes, - - - - - 71
Precious stones, action of light on, - - - - 517

Preparation of absolute alcohol from strong spirit, - - - 504
— of aluminum, - - - - - - 203
— of osmotic membranes by electrolysis, - - - 506
Pressure and gravity, effect on electrolytic action, - - 441
— influence on the viscosity of water, - - - 602
— of light, - - - - - - - 285
— of light waves, - - - - - - - 80
Pressures giving rise to electrolytic action in the cell, - - 360
Production and maintenance at low temperatures, - - - 346
— of hitherto unknown metallic derivatives, - - 512
Properties and state of colloids, - - - - - 279
— of hydrogen selenide and hydrogen sulphide compared, - 347
— relation to atomic mass, - - - - - - 515
Pseudo-catalytic oxidation, - - - - - - 202
p-toluylic acid, electrolytic oxidation of, - - - - 204
Pumps, mercury, self-acting, - - - - - - 276
Pyridine and acetonitrile solutions of silver nitrate, relative velocities of the irons in. Herman Schlundt, - - - 159
— and piperidine series, dielectric constants by Drude's method, 208
Pyrite and marcasite, - - - - - - - 439
Pyrochemical Daniell cells, - - - - - - 155
Pyrogenic reactions and syntheses by means of the electric current, - 283
Pyrometric constants of selenium, - - - - - 347
Quantitative determination of bismuth by electrolysis, - - 158
— — of cadmium, - - - 206
— precipitation of metals by organic bases, - - - 153
Radiation, dark, - - - - - - - 285
— from a mixture of chlorides of radium and barium containing rays which can be reflected, - - - - - 518
— from black bodies, - - - - - - 285
— law of black bodies, - - - - - - 81
Radio-active substances, - - - - - - 518
— — substances, effects on the luminosity of gases, - - 364
Radio-activity, absorption by liquids, - - - - - 518
— — induced, caused by salts of radium, - - 76, 518
— — secondary, - - - - - - 77
— — of salts of radium, - - - - - 364
— — of uranium, - - - - - - 364
Radio-micrometer, for measurement of indices of refraction for electric waves, - - - - - - - 76
Radium and barium chlorides, a mixture giving a radiation which contains rays which can be reflected, - - - 518
— radiation, - - - - - - - 76
— radio-activity of salts of, - - - - - 364
— rays and Roentgen rays, influencing the conductivity of liquid dielectrics, - - - - - - 518
— — chemical reactions produced by, - - - 364
— — action on selenium, - - - - - 77
— — physiological action of, - - - - 284
— salts as cause of induced radio-activity, - - - 76
— — induced radio activity caused by, - - - 518
Rapid measurement of surface tensions, - - - - 82
Rare earths and salts of bismuth, isomorphism between, - - 153
Rarefied gases, electrical discharge in, - - - - 72
Rate of decomposition of ammonium nitrite, - - - 154
— of hydration of metaphosphoric acid, - - - 440
— of reaction between arsenious acid and iodine in acid solution. J. R. Roebuck, - - - - - - 365
— of solution, - - - - - - - 202

Rate of solution of zinc in acid solution, - - - - 155
— of solution of solids, II., - - - - - 202
Ratio of the specific heats of a gas, theoretical evaluation of, - 149
Rays as influencing the spark discharge, - - - - - 77
Reaction between chlorine and ammonia, - - - - 68
— between ethyl alcohol and hydrochloric acid, - - 437
— during oxidation with gaseous oxygen, - - 154
— heats between substances as solids and as gases, - - 346
— rate between arsenious acid and iodine in acid solution. J. R. Roebuck, - - - - - 365
— velocity for bromine and ethyl alcohol, - - - 154
Reactions during the formation of calcium carbide, - - 511
Reciprocal action of oxidizing and reducing agents, cells based on the, 360
— nature of solubility changes, - - - - - 503
— salt pairs, III., - - - - - - 151
Reducing action of lead and mercury cathodes in sulphuric acid solutions, 510
— and oxidizing agents, cells based on the reciprocal action of, - 360
Reduction and oxidation cells, - - - - - 359
— electrochemical of ketones, - - - - - 204
— electrolytic of nitro-urea, - - - - - 511
— of nitric acid electrolytically, - - - - - 510
— of silver chloride by hydrogen and the reverse reaction, - 200
Reflectable rays contained in the radiation from a mixture of chlorides of radium and barium, - - - - - - 518
Reflecting surfaces, silver, physical properties of, - - - 80
Refining, electrolytic, of tin scrap with caustic soda solution, - - 511
— electrolytic, in Germany, - - - - - 281
Refraction, indices, for electric waves, - - - - - 76
Refractive energy, conservation in mixtures of alcohol and water, 363
— indices of calcium chloride solutions, - - - 77
— — of liquid mixtures, - - - - - 363
Regulator of temperature, automatic, - - - - - 430
Relation $\frac{L+S}{T} = \frac{Q}{T} = K$, - - - - - 348
— between density and index of refraction of air, - - 515
— of properties to atomic mass, - - - - 515
— of the conductivity of metals for heat and electricity, - 71
Relative velocities of the ions in solutions of silver nitrate in pyridine and acetonitrile. Herman Schlundt, - - - - 159
— velocities of ions, apparatus for determining, - - - 443
Remarks on a paper of Mr. Caubet on the liquefaction of gas mixtures, - 435
— on the paper by Mr. V. Czepinski, - - - - 508
Reply to remarks of Felgentraeger, - - - - - 276
Report, ninth annual of the committee on atomic weights, - - 496
Researches with standard cells, - - - - - - 69
Resistance, internal, of galvanic cells, - - - - 509
— liquid for laboratory purposes, - - - - - 284
Resorcinol in ethyl alcohol, heat of solution of, - - - - 435
Retrograde diffusion of electrolytes, - - - - - 506
Reversible reactions, - - - - - - 67
Röntgen and Becquerel rays, - - - - - - - 76
— and Becquerel rays, action on the eye, - - - 76
— rays influencing the conductivity of liquid dielectrics, - 518
Rotation and dispersion of spontaneously active substances, - 515
— of optically active compounds, influence of solvents on the, - 517
Rotatory power, influence of the hetero-cyclic group on, - - 516
Saccharose, inversion of, - - - - - - 358
Saccharabioses, magnetic rotation of some, - - - 517

Salt pairs, reciprocal, III., - - - - - - 151
— reaction in cells, re-inforced by oxidizing and reducing agents, 441
— solutions, dilution constants for, - - - - - 352
— with a common ion as affecting the electromotive force of concentration cells, - - - - - - 157
Salts of amines, action of bases and acids on the, - - - 200
— molecular weight in acetone, - - - - - 434
Saponification of carbonic and sulphuric esters, - - - 439
Schweidler, E. v. Remarks on paper on fluid dielectrics, - 73
Sealed tubes, a new method of handling liquefied gases in, - - 346
Secondary radio-activity, - - - - - - 77
Selenide of hydrogen, physical properties of, - - - 347
Selenium, - - - - - - - 498
— action of radium rays on, - - - - - 77
— boiling-point and some other pyrometric constants, - 347
Self-acting mercury pumps, - - - - - 276
Semi-complex salts, constitution, as shown by transference experiments, 207
Sensitiveness of the higher vegetables to potassium salts, - 207
— to light of fluoresceine, etc., - - - - - 79
Sesquisodic phosphate, - - - - - - 354
Short circuits, electrolytic, in concentration cells, - - - 203
Significance of changing atomic volume, - - 146, 147, 276, 496
Silicic acid hydrogel, structure of, - - - - 499
Silicide of calcium, investigations on, - - - - - 353
— of lithium, - - - - - - 499
Silicon hydride, preparation and properties of a new, - - 347
— in cast iron, state of, - - - - - 351
Silver, action on hydrobromic acid and the reverse reaction, - 354
— and sodium chlorates, mixed crystals of, - - - 436
— chloride, reduction by hydrogen, - - - 200
— — solar radiation on, in presence of hydrogen, - 284
— ions, apparatus for determining relative velocities of, - 443
— oxide, action of hydrogen peroxide on, - - - 356
— nitrate, action of disodium phosphate on, - - - 201
— — in pyridine and acetonitrile, relative velocities of the ions in solutions of. Herman Schlundt, - - - 159
— precipitated and separated electrolytically, - - - 70
— reflecting surfaces, physical properties of, - - - 80
— sub-halides, - - - - - - 199
— sulphate and mercury sulphate, solubility of, - - 199
Simultaneous action of two bases on phosphoric acid, - - 201
Simple liquid resistance for laboratory purposes, - - - 284
Sodium amalgan, decomposition of organic halogen compounds, - 507
— and potassium melting-point of alloys of, - - - 433
— carbonate, ethyl alcohol and water, equilibria in the system, 502
— chlorate and silver chloride, mixed crystals of, - - 436
— hydride, preparation and properties of, - - 352
— hydroxide and lead chloride fused, decomposition voltage of, - 442
— — thermal study of the solid hydrates of, - 353
— metallic, manufacture and use of, - - - - 442
— nitrate, decomposition by sulphuric acid, II., - - 67
— phosphate, a new, - - - - - 354
— sulphate, and sodium chloride, solubility of mixtures of, - 436
— — and copper sulphate, solubility of mixtures of, - 354
— — influence on the vapor pressure of aqueous ammonium solutions, - - - - 436
Solar radiation on silver chloride in presence of hydrogen, - - 284
— spectrum, measures of wave-length in the, - - 363

Solid and liquid ammonia, heats of solution of, - - - 353
— phases, synthetic analysis of. W. D. Bancroft, - - 178
Solids, rate of solution of, - - - - - 202
Solubilities, calculation of, and equilibrium constants of chemical reactions, 431
Solubility changes, reciprocal nature of, - - - 503
— electrolytic conductivity and chemical action in liquid hydrocyanic acid. Kahlenberg and Schlundt, - - - 447
— of ammonia in salt solutions, by measurement of partial pressure, 278
— of analogous salts, - - - - - 499
— of barium sulphate in ferric aluminum and magnesium chloride solutions, - - - - - 436
— of calcium carbonate in aqueous solutions of certain electrolytes. Cameron and Seidell, - - - - 50
— of calcium oxalate, - - - - - 278
— of the calcium salts of the acids of the acetic series, - 499
— of carbon monoxide in binary organic mixtures, - - 504
— of di-calcium phosphate in pure water, - - 351
— of gypsum, - - - - - - 498
— of the heavy metal hydroxides in sodium hydroxide, - 503
— of manganous sulphate, - - - 150, 434
— of mixtures of sodium sulphate and sodium chloride, - 436
— of mixtures of copper sulphate and sodium sulphate, - 354
— of silver sulphate and mercury sulphate, - - 199
— of zinc hydroxide in ammonia and ammonia bases, - - 437
Soluble anodes, precipitates formed during electrolysis with, - 511
— of metals, rate of, I., - - - - - 154
Solution of solids, rate of, - - - - - 202
— of some fluorides of the heavy metals, behavior of, - - 151
— rate of, - - - - - 154, 202
Solutions, alkaline, of metallic hydroxides, - - - 504
— aqueous, of non-electrolytes, freezing-point of, - - 434
— formula for depression of freezing temperature of, - - 434
— of inorganic salts in water, - - - - 277
— isobaric aqueous, - - - - - 151
— molecular surface energy of, - - - - 286
— of stannous salts, III., - - - - - 68
— theory of, - - - - - 153
— thermochemistry of very dilute, - - - - 151
— vapor pressure of, - - - - - 352
— viscosity of mixtures of liquids and of, - - - 84
— which are not electrolytes, specific heat of, - - 435
Solvent and dissociating action of liquid cyanogen and liquid hydrocyanic acid, - - - - - - 158
— influence on electrolytic conduction. H. E. Patten, - 554
— liquid nitrogen peroxide as a, - - - - 513
— — sulphur dioxide as, - - - - 444
Solvents, influence on the rotation of optically active compounds, - 517
— in molecular weight determinations, nitriles as. L. Kahlenberg, 45
— inorganic and ionizing media, - - - - 445
Spark discharge as influenced by rays, - - - - - 77
Specific gravity of cuprous iodide, - - - - 149
— heat of solutions, - - - - - 502
— — of solutions which are not electrolytes, - - 435
— — and atomic mass of vanadium, - - - 353
— heats of gases, the two, - - - - 432
— — of a gas, theoretical evaluation of the ratio of the, - 149
— — at the absolute zero, - - - - 429
— velocity of ions in the discharge from points, - - 73

Specific volumes of oxygen and nitrogen vapor, - - 497
— — and vapor pressures of isopropyl isobutyrate, - 497
— volume as a characteristic of chemical compounds in metallic alloys, 150
Spectra, densities and melting-points of some groups of elements, 515
— of hydrogen and some of its compounds, - - 284, 446
— of hydrogen and the spectrum of aqueous vapor, - 446
Spectral equation of polished platinum, - - - - 81
Spectrophotometric study of hydrolysis of ferric chloride solutions, 445
Spectroscopic notes concerning the gases of the atmosphere, - - 78
Spectrum, continuous spark, - - - - 446
— of a gas as influenced by small impurities, - - - 78
— of cyanogen, - - - - - 284
— ultra-red of the alkali metals, photographs of, - - 78
Sphere of action of molecular force, - - - - 83
— of action of molecular force and the thickness of films, - 82
Spores of *Penicillium*, germination in moist air, - - 358
Stability of the equilibrium of univariant systems. Paul Saurel, - 257
Standard cells, researches with, - - - - 69
Stannous salts, studies on solutions of, III., - - - 68
State and properties of colloids, - - - - 279
— critical, of a one-component system. Paul Saurel, - - 474
Steel and pure iron, electrical resistance of, - - - 513
— magnetization at liquid air temperatures, - - - 509
Steels, expansion at high temperatures, - - - 350
— nickel and carbon, thermoelectricity of, - - - 360
— transformation of in the dilatometer, - - - 350
Stefan's law, measuring higher temperatures by means of, - - 517
Stream of electric particles, striae in a, - - - 75
Stresses in solid bodies due to unequal heating and double refraction, - 81
Striae in a stream of electric particles, - - - - 75
Strong electrolytes, dissociation of, - - - - 208
— — validity of the mass law for, - - 208
Strontium amalgam, action of hydrogen on, - - - 356
— hydride, preparation and properties of, - - 355
— metallic and its hydride, - - - - - 353
— zinc and cadmium, alloys of, - - - - 353
Structure of silicic acid hydrogel, - - - - 499
— system and magnetic properties of fluid crystals, - 82
Studies in neutralization, - - - - - 208
— in vapor composition, II. H. R. Carveth, - - 237, 321
Subhalides of silver, - - - - - - 199
Sucrase, investigations of the law of action of, - - - 358
Sulphate solutions of nickel and iron mixed, precipitation of, - - 206
Sulphates of neodymium and praseodymium, - - - 358
Sulphohalides of lead, - - - - - - 68
Sulphur dioxide, liquid, as solvent, - - - - 444
— gaseous, density determinations by Dumas's method, - 497
Sulphuric acid, the physical chemistry of, - - - 278
— — decomposition of sodium nitrate by, II., - - 67
— and carbonic esters, saponification of, - - - 439
Sulphurous acid, liquid, change in conductivity of salt solutions in, - 71
Surface energies and densities of liquid oxygen, nitrogen, etc., variation with temperature, - - - - 602
— energy, molecular of solutions, - - - - 286
— tension, - - - - - - 83
— — and density of liquid air, - - - 497
— — a method of measuring, - - - 518
— — at the interface of two liquids, - - - 601
— — of oil-covered water surfaces, - - - 83

Surface tension of liquids, a new method for determining, - - 286
— — of liquid air, - - - - 286
— — rapid measurements of, - - - - 82
— — of water above 100°, - - - - 601
Susceptibility of salt solutions of the iron group, temperature coefficients of the, - - - - - - - 280
— of water, - - - - - - - 281
Syntheses and pyrogenic reactions by means of the electric current, - 283
Synthesis, new, of formic acid, - - - - 352
— — of methane, - - - - - 357
Synthetic analysis of ternary systems. A W. Browne, - - 287
— analysis of solid phases. W. D. Bancroft, - - - 178
System bismuth oxide, nitric acid and water, - - - 502
— ether, water, and hydrochloric acid, chemical process in, - 152
— sodium carbonate, ethyl alcohol and water, equilibria in the, 502
Systematization of inorganic compounds based on electro-affinity, - 442
Systems containing iron and carbon, chemical equilibrium in, - 350
— of three components, equilibria in, - - - 502
Tachhydrate, formation of, - - - - - 151
Tammann, on a theorem of. Paul Saurel, - - - - 410
Tantalum, preparation in the electric furnace, - - - 349
Tartrates in glycerol, optical rotation of certain, - - - 77
Tellurium and antimony, alloys of, - - - - 433
— and lead, alloys of, - - - - - 433
Temperature as influencing the thermal conductivity of glass, - 69
— coefficient of the susceptibility of salt solutions of the iron group, 280
— coefficient of the Daniell cell, change with the concentration of the zinc sulphate, - - - - - 359
— effective, of the sun, - - - - - 496
Temperature regulator, automatic, - - - - - 430
— variation of the surface tensions and densities of liquid oxygen, nitrogen, etc., - - - - - 602
Temperatures in Geissler tubes, - - - - - 81
Ternary electrolytes, dissociation relations with, - - 158
— systems, synthetic analysis of. A. W. Browne, - - 287
Thallium alloys, - - - - - 432
— chlorobromides of the type Tl_2X_6, - - - - 356
— picrate, physical isomerism of, - - - 149
— salts, - - - - - - 356
Theorem of Tammann. Paul Saurel, - - - - 410
Theoretical evaluation of the ratio of the specific heats of a gas, - 149
— heat of solution of $CdSO_4^{8}/_{3}H_2O$, - - - 499
Theory of, and equation of state of cyclical motion, - - - 149
— of cloud formation on mountains, - - - 69
— of electrolytic copper extraction, - - - - 361
— — dissociation and instantaneous chemical reactions. L. Kahlenberg, - - - - - 1
— of ions and contact electromotive force, - - - 203
— of lead accumulators, - - - - - 203
— of solutions, - - - - - - 153
— of the flowing electrode, - - - - 156
— of unsaturated compounds, - - - - 496
Thermal absorption of carbon dioxide, - - - 67
— conductivity of glass as influenced by temperature, - - 67
— equivalents, the dissociation, vaporization, etc., of ammonia, 348
— properties of isopentane and normal pentane, - - 149
— study of solid hydrates of potassium hydroxide, - - 352
— — of solid hydrates of sodium hydroxide, - - 353

Thermochemistry of alloys of copper and zinc, - - - 150
— of very dilute solutions, - - - - - 151
Thermodynamic scale of temperature, practical attainment of, - 148
Thermodynamics and dissociation theory of binary electrolytes, - 513
— of concentrated solutions, - - - - - 152
— of the voltaic cell, - - - - - - 440
Thermoelectric and thermomagnetic properties of crystalline bismuth, 157
— properties of oxides and metallic sulphides, - - 69
Thermoelectricity of carbon and nickel steels, - - - 360
Thermomagnetic and thermoelectric properties of crystalline bismuth, 157
Thermometer (air) studies with the, - - - - - 66
— electrical, - - - - - - 361
— gas, at high temperatures, - - - - 432
Thermometers, petroleum ether and platinum resistance, - - 283
— of hydrogen and helium gas, - - - - 431
Thermopiles, graduation of, - - - - - 441
Thermoregulators and thermostats. W. C. Geer, - - 85
Thermostat, sensitive to a thousandth of a degree. Bradley and Browne, 118
Thermostats and thermoregulators. W. C. Geer, - - 85
Thickness of films and the sphere of action of molecular force, - 82
Thorium, a new element associated with, - - - 65
Tin-aluminum alloys, - - - - - - - 350
Tin-copper alloys, constitution of, - - - - 498
— crystals and mossy tin, by electrolysis, - - - 282
— lead and bismuth alloys. E. S. Shepherd, - - 519
— scrap, electrolytic refining with caustic soda solution, - 511
— -zinc, copper-tin and copper-zinc alloys, new determinations of, 150
Transformation of steels in the dilatometer, - - - 350
Transference experiments for showing constitution of semi-complex salts, 207
— numbers of ions during electrolysis of their solutions, - 443
Transferences and velocities of ions, apparatus for illustrating, - 207
Transparency of hydrogen for light, - - - - 79
Triple point. Paul Saurel, - - - - - - 399
— salt, acid, - - - - - - 151
Two specific heats of gases, - - - - - 432
Ultra-red spectrum of the alkali-metals, photographs of, - 78
Undissociated molecules, electro-capillary action of, - - 360
Union of hydrogen and chlorine, - - - - 435
Unipolar discharge and gaseous ionization from glowing bodies, - 73
Unit of the atomic weights, - - - - - 198
Univariant systems, stability of equilibrium in. Paul Saurel, - - 257
Unsaturated compounds, theory of, - - - - 496
Uranium, a new investigation concerning the atomic weight of, 146, 429
— electrolytic method applied to, - - - 70
— radio-activity of, - - - - - 364
Use, modified, of equality signs in chemical equations, - - 430
Vacua, chemical method for obtaining, - - - - 430
Validity of the mass law for strong electrolytes, - - 208

Wave form of light, change in passing into a dispersing and absorbing medium, - - - - - - 80
— lengths in the solar spectrum, measures of - - 363
Welding, aluminothermic, by means of an automatic outflow, - 276
Weston cadmium cell, researches with the, - - - 69
— — cell, with a 14.3 percent amalgam, irregularities of the, 69
— cell, internal resistance of the, - - - - 71
Xenon, neon, krypton, and argon, classification of the atomic weights of, 346
Zeeman effect, on the electric analogy of the, - - - 80
Zinc and copper alloys, thermochemistry of, - - - - 150
— and lead, hydroxides of, - - - - 437
— -copper, copper-tin, and tin-zinc alloys, new determinations of, 150
— hydroxide, solubility in ammonia and ammonia bases, - 437
— oxide, action of hydrogen peroxide on, - - 356
— rate of solution in acid solution, - - - - 155
— strontium and cadmium, alloys of, - - - 353
— sulphate and copper sulphate, mixed crystals of, - - 503
— — inversion of. Barnes and Cooke, - - 172
— sulphates, change of concentration of, in the Daniell cell and the change of the electromotive force, - - - 359
